

University Certificate in Concrete Technology

This qualification can be carried out whilst on furlough!

"Having completed the Derby course, I can now interact with others on a technical level that wasn't possible for me before"

Why choose this course?

- Conveniently delivered, on-line and at the University of Derby Enterprise Centre* over one year, this course is the ideal launch pad for further study in Concrete Technology.
- This on-line course has been developed by University of Derby with The Concrete Society and the Institute of Quarrying - so you can be sure you're learning relevant and up to date information.
- On successful completion you'll gain a nationally recognised qualification, a Level 4 University Certificate in Concrete Technology, which will help your career development.
- Graduates of this course will be eligible to apply for Membership of the Institute of Concrete Technology at Associate level.

The course starts in September so apply early to ensure all course materials are received in good time.

Who's it for?

This course is open to all with an interest in concrete particularly;

- anyone within the industry wishing to gain formal recognition of their experience.
- supervisors, managers and support personnel wishing to gain wider knowledge of the science of concrete and its properties.

*The optional tutorial sessions may be delivered online due to Covid 19.
