

The production of concrete

An understanding of fresh concrete manufacture
with emphasis on the ready-mixed industry

Thursday 12 November 2020

Morning seminar on-line

This morning Technical Seminar aims to provide an overview of the methods of producing concrete. A connecting theme throughout each presentation is how concrete is manufactured with quality as the utmost importance.

The event will offer an in-depth insight for Engineers, Graduates, Producers, Constituent Suppliers and Apprentices with a focus on understanding the importance of how the constituents are put together and how to manufacture quality controlled fresh concrete fit for the end user.

The sessions start at 09:45am and will close at approximately 12:30pm with short breaks between sessions. Joining instructions will be provided on confirmation. A literature pack will also be supplied which includes a copy of presentations post event.

Key topics to include:

- | | |
|-------------------------------|---------------------------------------|
| • What is concrete | • Quality control |
| • How concrete is produced | • Awareness at site (producer's view) |
| • What is concrete mix design | • Consequences of poor mix design |

Fee: £45 (Concrete Society members) +VAT or £65 (Non-Concrete Society members) +VAT. A **10% discount is available for multiple delegate bookings**. An invoice will be issued upon receipt of the booking. At least 3 days' notice is required for full refund. Late cancellation refund at the discretion of the Society.
