

Assessment of in-situ concrete strength from cores

New Standards and guidance for core and NDT results

Wednesday 3rd February 2021

Morning seminar on-line

This morning Technical Seminar aims to provide guidance on the latest Standards relating to sampling and testing of core samples, NDT testing and the assessment of in-situ concrete strength.

The event will offer an in-depth insight for engineers, supervisors, laboratory, technical managers and technicians on the in-situ strength assessment with the focus upon practical interpretation of the newly revised BS EN 13791 and BS EN 12504-1.

The day begins with registration at 09:45am and will close at approximately 12:30pm with short breaks between sessions. Joining instructions will be provided on confirmation.

Key relationships:

BS EN 12504-1: 2019 (December)

Testing concrete in structures. Cored specimen - taking, examining and testing in compression

BS EN 13791: 2019 (February 2020)

Assessment of in-situ compressive strength in structures and precast concrete components

Fee: £45 (Concrete Society members) +VAT or £65 (Non-Concrete Society members) +VAT. A **10% discount is available for multiple delegate bookings**. An invoice will be issued upon receipt of the booking. At least 3 days' notice is required for full refund. Late cancellation refund at the discretion of the Society.
