

# Concrete identity testing

How to carry out correctly and what you need to do when it all goes wrong!

Thursday 15 March 2018

Concrete Society, Riverside House, 4 Meadows Business Park,  
Station Approach, Blackwater, Camberley, Surrey, GU17 9AB

The Concrete Society is running a Technical Seminar giving presentations relating to the site acceptance testing of concrete (consistence, air content, cube casting and testing) and importantly how to assess the results for compliance. In the event of uncertain results the interpretation of strength from cores is discussed in detail plus NDT assessment (rebound hammer, UPV etc).

The event will offer an in-depth insight for Engineers, Supervisors, Students and Technicians with the focus understanding the importance of a correct Identity Testing regime and the relevance of investigation measures when strengths are apparently not as specified.

The day starts with Registration at 09:15 and will close at approximately 15:30 following a summary of the day's event. A full agenda for the day will be issued upon receipt of applications, including directions to the venue. A literature pack will be supplied and discounts on Concrete Society material will be available.
