

# **Concrete Society Scotland Region**

## **Achieving Durability in Concrete Structures**

**The Garfield Hotel**

**Cumbernauld Road Stepps Glasgow G33 6HW**

**Wednesday 25<sup>th</sup> October 2017**

**18.00pm start (registration, teas and coffee will be served from 17:30pm)**

**The Scotland Region is delighted to announce details of our forthcoming technical seminar  
Achieving Durability in Scotland**

**Many reinforced concrete structures suffer from defects and deterioration long before the end  
of their intended life.**

**This presentation explains the ways in which the durability and service life of concrete  
structures can be improved using BS 7973 compliant fibre concrete spacers and Controlled  
Permeability Formliner (CPF) as an 'Additional Protective Measure' (APM)**

**The presentation will be given by Mr Andy Gibb of Max Frank**

**This is a free to attend event, but to assist us with numbers, please can you register attendance  
by e mail, phone or fax. Please note that car parking is free at this event.**
