

Technical Event

Basic introduction to concrete & admixtures, fibres, cement types & practical laboratory session

Monday 28th April 2025

9.30am to 4:30pm

(coffee, refreshments & lunch included)

**Heidelberg Concrete Plant, Pendlebury Fold,
Westhoughton, Bolton, BL3 4SF**

The training day will provide a useful foundation for those concerned with the specification, production, construction, testing and day-to-day supervision of concrete. The day is aimed at providing training for contractors, specifiers, producers, newcomers to the industry or those who just want a refresher on the basics of concrete technology.

Presentations will be delivered by industry professionals in their specific areas of expertise and will provide an introduction to all things concrete, along with practical demonstrations.

- **What is concrete? The materials and the effect they have on key concrete properties**
 - **Concrete standards and specification**
 - **Concrete production and methods of delivery**
 - **The use of fibres in concrete**
 - **Concrete placement on the variety of sites within the construction industry**
 - **How concrete quality is assessed both in the fresh and hardened state**
-
- **Cost per delegate (includes lunch and refreshments) £90 + VAT per person**
 - **Registration @ 09:30 am onwards, starting at 10:00 am prompt**
 - **Please bring your own PPE**

Due to high demand for training days, please register your interest at the earliest opportunity

To book your place, email the booking form to: regionalevents@concrete.org.uk
