

Technical Event: Wednesday 6th November 2024

Wardell Armstrong LLP – Decarbonisation in Construction

The construction industry has a major part to play in achieving global sustainability goals. This is the second session in our Decarbonisation series, following on from the 'Decarbonisation in Construction: Why, What, How' event held in June 2024.

In this session, we will discuss:

- Sustainable construction - what is it?
- Climate-related legislation, policy, and targets
- Current progress
- Risks for the construction industry
- Implications for Wales
- Roadmap to net zero emissions

Location: Wardell Armstrong LLP, Tudor House, 16 Cathedral Road, Cardiff, CF11 9LJ

Date: Wednesday 6th November 2024

Time: Refreshments will be served from 17:00, presentation 17:30 – 18:30

Cost: Free (please register)

To book: register your place with Louise Dow ldow@wardell-armstrong.com

Presented by: **Sarah Hodson - Associate Director, Wardell Armstrong LLP**

Sarah is a Chartered Environmentalist and a member of the Institution of Environmental Sciences, with over ten years of technical experience working within the public, private, and third sectors. She specialises in carbon accounting and sustainability reporting for UK companies and overseas operations, providing climate-related services to a variety of clients and across all industry sectors.

Free to attend. Register your place with Louise Dow ldow@wardell-armstrong.com
